Generation ZX Founders

GenAI Edition

I keep coming back to the same question: who am I talking to? The answer is the founder, the person who is already motivated, already a minority, already up at three in the morning building because finally they can, and it does not matter what generation they are.

So Generation ZX is not a range of birth years. It is the people building because finally they can. We see it most in Generation Z and Generation X, which is why the two letters are on the cover, but a millennial who builds at three in the morning is one of them too.

We should say how many companies we helped along the way. Some got created and some did not.
